

Applicator Ring

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **Applicator Ring** tool is designed to provide a functional and safe way to correctly apply Preformed Line Products' armor rods, line guards and ties while working with an energized conductor. The specially-beveled ring permits easy encirclement of the helical leg, and facilitates positioning and removal of the product.

Features

- Provides safe and easy installation of formed wire products on an energized conductor
- Easily connects to any hot stick with a universal head
- Manufactured from stainless steel
