

# COYOTE<sup>®</sup> Defender

**Weight:** 0.00kg

**Dimensions:** 0.00cm x 0.00cm x 0.00cm

## Description

The original **COYOTE Defender** provides added protection for most PLP splice enclosure products including the stainless steel COYOTE Splice Case up to 28" long, injection molded COYOTE<sup>®</sup> CLOSURES, and COYOTE<sup>®</sup> Dome Closures. The Mounting Frame comes assembled from the factory - Hinge Brackets and Vertical Bracket components are fastened with 5/16" x 1" long self tapping screws. The Hinge Brackets are positioned 19" apart to mount the 28" long COYOTE Splice Cases. All other Splice Case and Closures are accommodated with the Adjustable Horizontal Bracket. Two large Doors and the Mounting frame surround the closure or splice case and allow easy access for future maintenance or expansion. The frame can be installed first, followed by each door (Door Weight 38# each) thus reducing the chore of lifting a bulky steel unit – this makes the Lineman's task manageable and less hazardous.

## Features

- If cable storage is necessary, the Defender mounting frame accepts the original FIBERLIGN<sup>®</sup> Crossarm Storage with Spool System.
- Can be mounted with through bolts, DA bolts, or banding.

## Documentation

### Application Procedures

[SP2906 \(COYOTE<sup>®</sup> Defender\)](#)

[SP3188 \(COYOTE<sup>®</sup> Defender Addendum\)](#)

[SP3038 \(COYOTE<sup>®</sup> Defender Bolt Mounting Hardware Kit\)](#)
