

Buried Line Wire Dead-end

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

Buried Line Wire Dead-ends are used for overhead construction applications of buried line wire.

Features

- Provide for safe applications at a low cost.
- They wrap on quickly by hand without tools.
- Firm, protective holding power is exerted uniformly throughout their length.
- The PREFORMED helical concept eliminates concentrated stress points or corrosion pockets to assure long, trouble-free, service life.
