

Advanced AWL System

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

Description

Advanced AWL System

The advanced AWL system provides additional benefits and features that allow light sequencing between multiple towers and daylight detection. It can also relay advanced communications to a central monitoring location or to mobile devices for up to the minute information.

Features

Standard AWL System with upgraded equipment options:

- Synchronous flashing between more than one beacon via Ethernet
- Synchronous flashing between more than one beacon via satellite
- Daylight detection
- Beacon failure detection
