

BRACE-GRIP[®] Dead-end for Rod Systems

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **BRACE-GRIP** System consists of a helically formed dead-end that develops 100 percent or more of the published rated breaking strength of the strand for which it is designed. The BRACE-GRIP is a cost effective solution for cross bracing on metal buildings.
