

COYOTE[®] ATC

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **COYOTE ATC (Aerial Terminal Closure)** is Preformed Line Products' first purpose-built aerial closure system focused to support the drop distribution network without the need for specialized drop cable assemblies. The closure features a unique dual chamber design with independent access to the splice/slack storage chamber and to the drop connection chamber. The cover latch system expedites access for drop installation and the fasteners secure the splice chamber cover to restrict access after initial installation. Inside the closure is a large slack storage area and splice tray system which support single fusion, mass fusion, mechanical splice protectors or splitter technology.

The ability to support standard drop cables, application flexibility, rugged construction and ease of use are just a few of several reasons to consider the new COYOTE ATC for your OSP fiber network.
