

# FIBERLIGN<sup>®</sup> Splice Trays

**Weight:** 0.00kg

**Dimensions:** 0.00cm x 0.00cm x 0.00cm

## Short Description

### Description

FIBERLIGN<sup>®</sup> Fiber Optic Splice Trays are suitable for use in all PLP<sup>®</sup> Splice Cases and splicing applications. The storage trays provide ample room for storing fiber and allow for a generous bend radius designed to assure long term optical performance. There are now two types of trays offered. The standard thermal-formed tray is available for all closures and splice applications. The ADOBE<sup>™</sup> Splice Tray is available as a lower cost alternative and is interchangeable with many of the thermal-formed trays. Both versions of the splice tray include a clear snap-on cover, felt tape for protecting buffer tubes, and tie wraps to secure the buffer or transport tubes to the tray. To find splice trays for a specific closure and specific splicing application, refer to the desired closure section of the catalog.
