

Dead-end Assembly - Twin-Bundle Conductor, Single Insulator, 50K

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

PLP **Dead-End String Assemblies** hold the conductor tension and are designed to accommodate up to 95% of the conductor's rated tensile load. The general designs given may be modified based on insulator strength and overall length requirements. A variety of tension adjustment devices are also available to accommodate changes in conductor tension.
