

COYOTE[®] In-Line RUNT Closure

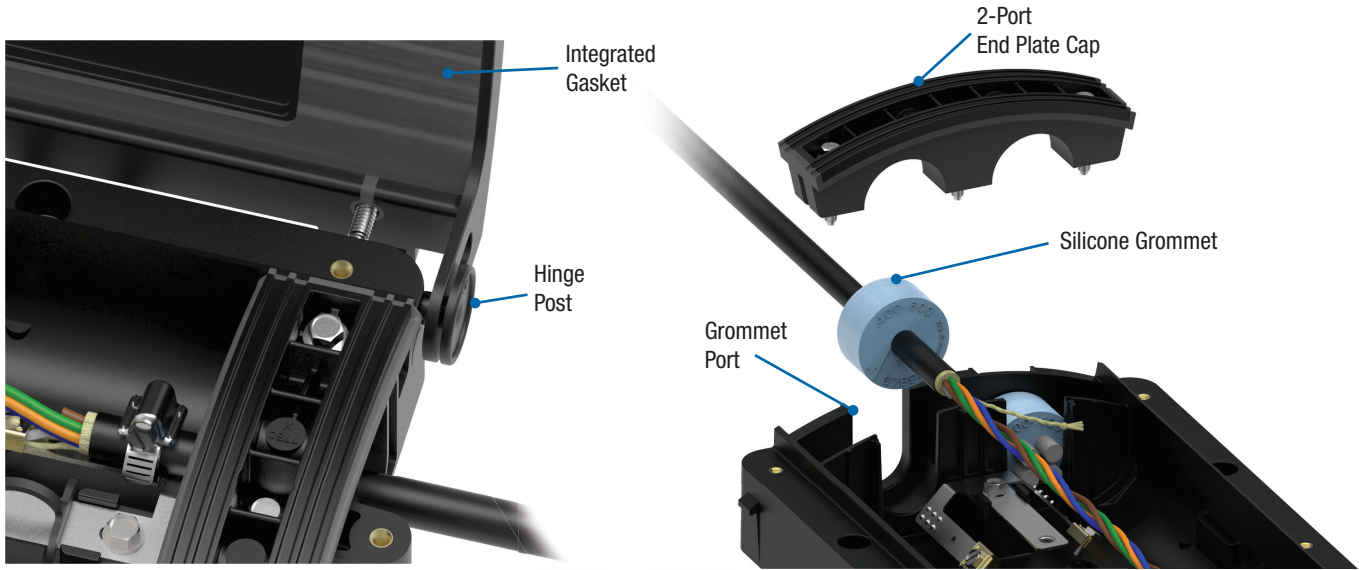

The **COYOTE In-Line RUNT Closure** has the versatility to be used in both distribution and fiber-to-the-premise (FTTP) networks for in-line or butt applications. The compact size allows for placement in small handholes and pedestals.

Features and Benefits

- Internal organizer manages buffer tube or ribbon
- Multiple splice tray designs support mass fusion splicing, single fusion splicing or a combination of both
- Flexible grommet sealing technology supports a wide range of flat and round cable profiles
- Factory-installed gasket allows re-entry and re-use
- Flame-retardant kits available
- Designed and tested in accordance to Telcordia[®] GR-771-CORE Buried, Underground, IP-68 Rated Requirement

External Features

The hinged cover allows for quick, easy access to the closure interior; no special tools required. A durable factory installed sealing material is installed on each end plate cap and cover to simplify assembly and allow reuse. The flexible, single and multi-hole COYOTE® Silicone Grommets provide a secure seal around a variety of cable profiles and eliminates the need for scuffing, adhesives, or sealing tapes.

Internal Features

The standard LITE-GRIP® Splice Tray is supplied with felt tape, splice blocks, and LITE-GRIP retention sleeves. If your application involves ribbon cable, a fiber organizer kit can be ordered separately to enhance the ribbon storage area. Factory installed cable restraint hardware is designed to provide proper pull-out strength and restricts strength member pistoning inside the closure.
