

Ranger SERVICEAL® Closure

The Ranger SERVICEAL Closure provides long term protection for buried service wire splices up to six pairs (0.500" [13mm] cable diameter).

Installation of the Ranger SERVICEAL Closure is fast and easy. After preparing the service wires, simply lay them within the grooves in the cap, lay the exposed cable shield within the Bonding Connector and tighten. Splices on the individual pairs are easily organized around the integral Insertion Ram. A twist and a snap secures the pre-filled vial over the splices.

Features:

- Only two components, pre-filled vial and cap with integral Insertion Ram and Bonding Connector
- Vial pre-filled with field proven POLY-BEE™ Sealant for maximum protection
- Octagon shaped Vial for ease of application and maximum splicing capacity
- Enhanced, integral Bonding Connector
- Positive locking feature to insure proper application and to discourage re-use
