

COYOTE® PEDBOX™

The **COYOTE PedBox** is an outdoor distribution splice enclosure that can be mounted inside a pedestal. The flexible pre-slit silicone grommets allow for easy installation for a wide range of flat and round cables in any weather condition. The splice platform can be removed to allow access to slack storage or to move away from the pedestal. The base comes with a ground stud for common bonding practices. The included mounting bracket allows the closure to be mounted on the side or back of a 10" or larger pedestal.

FEATURES AND BENEFITS

- Pre-slit silicone grommets allow for easy installation in any weather condition
- Flexible grommet technology supports a wide range of flat and round cable profiles
- Removable splice platform allows splice trays to be moved from the pedestal to a more suitable working environment
- When in a stored state, the splice trays are protected by the splice platform as it provides an additional layer of security when the pedestal cover is removed
- Can be mounted in pedestals 10" in diameter or larger
- Included pedestal mounting bracket can be attached to side or back
- Aluzinc powder-coated metal enhances corrosion resistance, offering more protection than traditional powder-coated steel

CROSS-CONNECT APPLICATION

The COYOTE® PedBox™ has added versatility for cross-connect applications, providing plug and play technology with industry standard connectors – up to 12 SC or 24 LC. The PedBox can be populated with a variety of adapter types and is compatible with bare fiber or pre-connectorized splitters. This is ideal for applications where services need to be redirected often without having to re-splice each time.
