PLP® Arborist Products Heavy-Duty Thimbles for TREE-GRIP™ Dead-ends

General Information

Heavy-Duty Thimbles are available with locking tabs (patented) or without locking tabs and are designed to fit into the loop of a TREE-GRIP™ Dead-end. PLP recommends using these thimbles with TREE-GRIP Dead-ends to ensure proper application and performance. Each size is rated and laboratory tested to withstand the rated breaking strength of its designated strand size and is cycle test-proven to stay in place throughout the life of the cabling system. All Thimbles are hot-dipped galvanized to ASTM A153 standards for corrosion resistance. The locking tab version is useful to ensure the thimble stays in place before installation.

PLP now offers a wide range of tree cabling/bracing products to fit arborists needs. For information on the entire line of tree care products, please visit preformed.com or contact your local PLP representative.

Features

- Available in 3 sizes corresponding to TREE-GRIP Dead-end sizes
- Ensure best performance of the TREE-GRIP Dead-end
- Locking tab thimble remains in place during cable installation

PLP Reliability

Preformed Line Products has been a dependable manufacturer of high-quality products since 1947.
