

Tri-Seal Closure

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **Tri-Seal Closure** is designed for butt splice and/or subsurface terminal use. It can be used where the exact number of service connections are to be made on a continuing basis such as a new or developing residential area or mobile home park.

Features

- Quickly and easily applied
- Seals out moisture and corrosion
- Unaffected by soil conditions, even where acid and alkali prevail
- Clear cap is available for hand holes and allows visual inspection
- Unique oval port and two additional side ports allow re-entry of additional cables or service wires
- Kits come complete as ordered
