

RAPTOR PROTECTOR™ Platform

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

The **RAPTOR PROTECTOR™ Platform** is designed to provide the raptor an alternative to nesting on utility structures, where they are in danger of electrocution. The RAPTOR PROTECTOR Platform also eliminates many outages caused by the raptors and their young due to electrical short circuits and the fouling of insulators. The platform can be easily installed in a pole-top or side of pole application. The preassembled and lightweight platform can aid the utility in wildlife management and protection for years without maintenance.

Features

- Longevity of platform
- Strength
- Longevity of utility structures
- Corrosion reduction (steel)
- Reduction of insulator contamination
