

Bushing Covers

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

PLP's **Bushing Covers** for wildlife protection are designed to reduce the number of outages experienced on the utility's distribution system by insulating transformer bushings, lighting arrestors, capacitors and switching equipment from incidental contact by animals. This is achieved by covering energized components sufficiently so that an animal can not contact the component and ground potential simultaneously.
