

MULTI-BOND™ and MORAY™ Shield Connectors

MULTI-BOND Shield Connector

The MULTI-BOND Shield Connector offers you a reliable bonding harness for organizing telecommunications buried service wires and achieving an electrical bond between the cables and ground. The compact MULTI-BOND Shield Connector is designed to be used in multiple service distribution. It's a simple, sure and safe cable organizer.

Each kit includes a lug, clamps, five screws and nuts, and a bonding support plate.

Catalog Number	Description	Standard Carton Qty.
8003072	Bonding support plate, lug, clamps, five screws and nuts	15

MORAY™ and MINI-MORAY™ Shield Connector

Connect shield with confidence with the MORAY Shield Connector and the MINI-MORAY Shield Connector. The specially designed teeth penetrate the polymer coating on the cable shield to provide excellent pull-out strength and electrical contact. The tooth design resembles a “reverse-rake” pattern that allows teeth to “bite” into the cable shield. Two teeth under the “spring-action” connector top are designed to keep it from letting go of the cable sheath.

Constant Electrical Contact

The MORAY and MINI-MORAY Shield Connector with a “spring-action” top plate remain in contact with the shield at all times. The “spring-action” design is flexible enough to handle the expansion and contraction of the cable sheath that results from varying temperature ranges, yet strong enough to maintain constant electrical contact.

All Cable Sizes

With the addition of the MINI-MORAY Shield Connector, PLP can offer the flexibility of using the same reliable MORAY Shield Connector design for smaller diameter cables.
